Skills

- Javascript
 - React.js
 - CSS
 - Express.js
 - MongoDB
 - REST API
-

Experience/Projects

MiniPost- Full-stack social media application that utilizes frontend and backend technologies.

- React
- Express, Node, and Sessions authentication
- Vanilla CSS
- MongoDB and Mongoose

MiniPost API/backend- Created the backend/API for the MiniPost React app. The API handles routes for fetching data, registering new users, and authenticating.

- Node, Express, and JSON Web Token authentication
- MongoDB and Mongoose

Quackery- Full-stack application that utilizes web sockets to emit real-time data between connected users.

- Vanilla JavaScript, HTML, and CSS
- Express, Node, and Socket.io
- MongoDB

Completed Udemy JavaScript Course

- Started off with the very basics and moved into more advanced key features including ES6, Promises, async await, etc.
 - Created full-stack blog post application with JavaScript, MongoDB, Express, EJS, Sessions, RESTful API and JSON Web Tokens.
-

Education

AS, Computer Science

Bakersfield College, Bakersfield, CA

06/2023

(In-progress)
